GOSQAS

The GOSQAS platform addresses humanitarian response network gaps, particularly in delivery verification, fraud, quality assurance, and donor-vendor relationship management.

This platform is a publicly accessible logistical service that provides a user-friendly tracking system, relevant for creators and humanitarian contributors who wish to promote trust and operate with potentially life-saving efficiency.
Maker → **Tester** → **Distributor** → **Doctor**

1. Global communication and organization platform for decentralized manufacturers and local, low-resource settings

2. Transparent, centralized pathway for NGO/vendor/aid recipients relationships

3. Accessible from a computer or smartphone; no download or login required
